Comment: We urge you to reject this proposal as written as it increases risk to our family and neighbors in a high pedestrian area. Research has shown that "residential streets with a high proportion of multifamily residences, over 50% of the curb occupied with parked vehicles, and a large number of pedestrians" are more vulnerable to vehicle-pedestrian collisions. We recently had an incident on this block where a young boy was hit in the street. This development should be required to include parking or reduce the number of units. At the very least please install a roundabout and stop signs at the intersection of 67th and Palatine Ave N (as many of us have already requested) as it is an incredibly dangerous intersection with high vehicle and pedestrian/cyclist traffic. Thank you.
